

Neurish - Age Restriction Statement

Last Updated: June 2026

Neurish is an adult-only platform. You must be 18 years or older to create an account or use the service. Neurish does not provide access to children or young people under 18.

To comply with the Online Safety Act and UK age-assurance requirements, Neurish uses age-verification and age-assurance measures to prevent under-18s from accessing the platform. At present, this includes email verification. From Spring 2027, Neurish will introduce facial age-assurance technology to confirm that users are over 18.

Facial age-assurance is used only to estimate age. Neurish does not store biometric data, facial images, or any information that could identify you through facial recognition.

We do not knowingly collect, store, or process personal data belonging to anyone under 18. If we identify or reasonably suspect that an account has been created by someone under 18, we will remove the account and delete associated data.

This age restriction applies across the United Kingdom, including Scotland, England, Wales, and Northern Ireland.

If you believe an under-18 user has accessed the platform, please contact us at contact@explorebuddy.co.uk.
